

DOM Premium HT (PHT)

DOM SICHERHEITSTECHNIK

DOM PHT

The special thing about the DOM PHT is the comfortable reversible key. This locking system has a key copy protection thanks to a new patent until 2024. The system will be available at the end of 2010 in different cylinder types and can be configured according to the customers needs.

① Ramp for optimal key insertion

② Complex coding in the key impedes the fabrication of a key copy

③ Key made from nickel silver corrosion-free and low-wear

DOM security level

Application areas

Indoor or outdoor automats, depending on configuration

Your benefits and advantages:

- ✓ **High security**
thanks to patented technology.
- ✓ **High key copy protection**
thanks to filed key profile.
- ✓ **High drill protection**
thanks to hard metal pins in body and core or rotating hardened disk made from stainless steel (depending on configuration).
